

## T2'008 EU Rubber-spec Edition - Long Belt Contacting Pinion

On the T2'008 EU Rubber-spec Edition, the belt may slightly contact the pinion gear. Use these new 0.5mm eccentric composite middle layshaft bushings (the layshaft will sit 0.5mm lower) to help prevent the belt from contacting the pinion gear. The new 0.5mm eccentric composite middle layshaft bushings will be available under new part number (#302079).
